

Aquashield 3

3 IN ONE SPECIALITY

Aquashield 3 assists in removing existing scale from pool walls, particularly ceramic aggregate finishes. It also creates superb clarity in the water by ensuring calcium remains in solution and will keep build up on salt chlorinators soft. Pools using bore or dam water should use Aquashield 3 to ensure that metals remain in solution and don't stain the surface.

DESCRIPTION

A blue coloured liquid

ACTIVE CONSTITUENT

Selected Anionic Polymers

PRODUCT BENEFITS

Prevention of calcium and magnesium build-up on the pool surface.

Prevention of metals dropping out of solution

Assists with keeping calcium build up on the salt cell soft to ensure chlorine production is not inhibited.

NOTES

Used for removal of scale formation from pool surfaces. Protection of salt chlorinator cell by keeping calcium chloride in a softened state enabling the cell to be cleaned with minimum effort. Assists with keeping calcium chloride in solution. Helps to prevent metals from dropping out of solution onto the pool surface.
