

BanishX

ULTRA PHOSPHATE REMOVER

Focus Banish X Ultra is used to remove phosphates from swimming pool water.

DESCRIPTION

A viscous coloured liquid.

ACTIVE CONSTITUENT

Lanthanum Salts with Chitosan

PRODUCT BENEFITS

Removal of phosphates from pool water enhances the effectiveness of sanitation chemicals and the maintenance of quality pool water.

Compatible with all pools.

Easy to use.

NOTES

For best performance shake well to ensure contents are fully mixed before each use.

Check filter pressure and if high, clean or backwash filter.

Test pool water and ensure ph is between 7.2-7.6 and Total Alkalinity is between 80-120. Adjust accordingly.

Pre-mix dosage from chart above into a bucket of water.

With the pump running, add solution slowly through the skimmer box and circulate for two hours before allowing swimmers to enter the pool.

Phosphates will be removed by filtration.

Monitor filter pressure and clean or backwash as required.
