

Hydrochloric Acid

Focus Hydrochloric Acid is used to reduce total alkalinity and pH in swimming pools and spas.

DESCRIPTION

A clear, colourless (water like) liquid.

ACTIVE CONSTITUENT

Hydrochloric Acid (pH 1.5)

PRODUCT BENEFITS

Instant pH reduction.

Economical

NOTES

Extreme care should be taken when handling the product due to its corrosive nature.

As a rough guide 500ml of HCL should be added per 50,000L of pool water for each pH colour change.
