

Hydroclear

Focus Hydroclear algae treatment is effective against black algae green and brown varieties and can be used as a winteriser in the non-swimming months.

DESCRIPTION

A blue liquid in ready to use form.

ACTIVE CONSTITUENT

60g/l Benzalkonium Chloride 120g/l Poly Oxyethylene (dimethyliminio) Ethylene (dimethyliminio) Ethylene Dichloride

PRODUCT BENEFITS

Effective against black algae green and brown varieties.

Easy to use

NOTES

Algaecide products must be used with a registered sanitiser when the pool is used for bathing. To prevent the water appearing hazy, Focus Hydroclear Algae Treatment should NOT be added for at least 48 hours after super-chlorinating the pool. However, during normal dosing this time delay is not required. Use the product monthly or if under high bathing load use weekly.

WINTER MAINTENANCE

Use as a winteriser in non swimming months to keep pools free of algae.
