

Pool FLOC

CLARIFYING FLOCCULANT

Focus Pool Floc is a granular concentrated formula that is used for binding together small particulates for removal by the filter media, It works by dropping debris to the bottom of the pool floor for vacuuming to waste.

DESCRIPTION

A white powder.

ACTIVE CONSTITUENT

Aluminium Sulphate

PRODUCT BENEFITS

Coagulates for easy vacuuming

Suitable for all pool surfaces

Especially effective on heavy duty debris.

NOTES

Used for dropping unfilterable matter to the bottom of the pool floor for vacuuming to waste. Add 1 kilo per 40,000 litres of pool water for light contamination and 4 kilograms per 40,000 litres of pool water for heavy soil suspensions.
