

Waterpolish

PLUS

Focus Waterpolish Plus is a concentrated formula used to combine small particulates together for collection by the filter media restoring sparkle.

DESCRIPTION

A blue liquid supplied in a ready to use formula.

ACTIVE CONSTITUENT

Cationic Poly-electrolyte

PRODUCT BENEFITS

Clear, sparkling pool water.

Easy to apply.

pH neutral formula.

Compatible with all sanitation systems.

Economical.

NOTES

This product binds small particles together so they can be filtered out, restoring sparkle and polish to the pool water.

This product is applied by pouring the required amount around the edge of the pool with the filter running.

Attention should be paid to the pressure gauge on the filter and if necessary backwash or hose cartridge if excess pressure is reached.
