

pH Increaser

pH LEVEL ADJUSTER

pH Increaser assists in maintaining correct pH in pools prevents wrinkling of liners, etching of surfaces and eye irritation.

DESCRIPTION

Greyish powder

ACTIVE CONSTITUENT

Sodium carbonate (99.2% available)

PRODUCT BENEFITS

Increases pool water pH without affecting total alkalinity.

Consistent quality.

Convenient pack sizes.

NOTES

FOCUS pH INCREASE is a free flowing alkaline powder. When added to the swimming pool or spa, it will raise the pH quickly and effectively. Some of the adverse consequences of low pH (acidic water) are bather discomfort - eg: irritation of swimmers' eyes, corrosion of equipment and fittings as well as possible damage to the pool surface.
